#### **EPG Commentary by Dan Steffens**

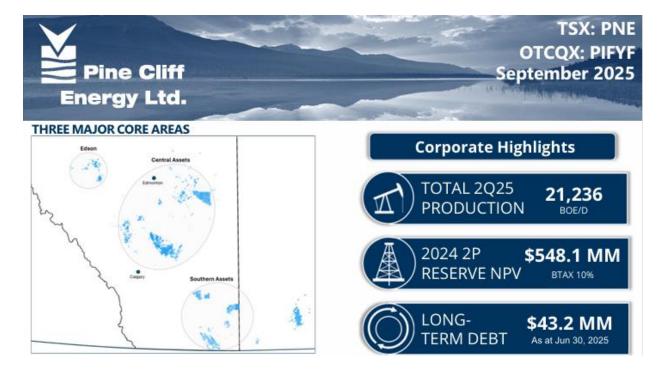

**Pine Cliff Energy Ltd. (PNE.TO and PIFYF)** is a Canadian Junior that was recently added to our Small-Cap Growth Portfolio. It is a "Gasser" with operations in Alberta and Saskatchewan. I added it to the portfolio because it has significant "Running Room" in four of Western Canada's top oil & gas plays. This one is for investors that believe AECO gas prices will rebound.

Pine Cliff has not completed any new wells in the last 18 months, but its low decline rate has enabled production to remain stable. The Company's hedging policy has enabled it to remain free cash flow positive despite the low

natural gas prices in Western Canada. Adjusted Operating Cash Flow was \$14.2Cdn million in 1H 2025.

#### Total production was 21,283 Boepd in Q1 2025 and 21,236 Boepd in Q2 2025.

- Production mix in the 2<sup>nd</sup> quarter was 80.5% natural gas, 13.4% NGLs and 6.1% crude oil
- Realized prices in \$Canadian dollars, including cash settlements on hedges were:
  - o Q1 2025: \$2.90/mcf for natural gas, \$43.03/bbl for NGLs and \$86.83/bbl for oil
  - Q2 2025: \$2.48/mcf for natural gas, \$35.94/bbl for NGLs and \$79.13/bbl for oil

Pine Cliff's free cash flow this year has allowed it to continue paying monthly dividends. Annualized yield based on the share price as of the date of this report was 2.5%. < If natural gas prices do move over \$3.50Cdn/MMBtu in Western Canada, I expect Pine Cliff to increase their dividends.

**Company Profile** 

**September 22, 2025** 

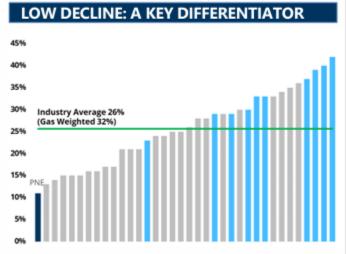

Pine Cliff recently announced a 25-year deal to supply natural gas to a private data centre in Central Alberta. The data centre will be supplied with 3.2–4.8 MMcf/d (volumes converted from annual commitments of 33 to 50 million cubic metres) of Pine Cliff's gas with pricing tied to NYMEX.

Long-life, low-decline asset base and disciplined capital allocation strategy support stable, predictable funds flow and long-term value creation.

- (1) As at Sep 10, 2025
- As at Sep 10, 2025. Reflects cumulative distributions since initiation in June 2022.
   Insiders include the Alberta Investment Management Corporation (AIMCO) and the officers and directors of Pine Cliff.
- (4) As at Jun 30, 2025

Pine Cliff's main source of growth has been through accretive acquisitions. The most recent 4Q23 acquisition added liquids exposure and drilling inventory.

In addition to higher natural gas prices, catalysts that should cause the share price to move higher in 2026 are the results of their Q4 2025 drilling program and announcements of more long-term contracts to supply natural gas to Al Data Centers being built in Western Canada. < One Al Data Center supply contract has been signed.

If you have been following my posts on the EPG Forum, you know that I am bullish on North American natural gas prices. In addition to the increased demand for space heating during the 2025/2026 winter months, LNG exports are going to be significantly higher in the U.S. and in Canada during 2026.

#### EIA Short-Term Energy Outlook released September 9, 2025

"We expect the Henry Hub spot price to average about \$3.00 per million British thermal units (MMBtu) for the third quarter of 2025. Natural gas inventories remain relatively high, and August ended with 6% more natural gas in storage compared with the five-year average. The Henry Hub spot price averaged \$2.91/MMBtu in August (10% below our August STEO estimate). Lower prices over this summer have been driven by robust production and reduced natural gas consumption in the electric power sector. However, we continue to expect that natural gas prices will gradually rise through the upcoming winter because inventories in our forecast are withdrawn at faster-than-normal rate this winter. The relatively strong inventory draws in our forecast mostly reflect rising LNG exports amid flattening U.S natural gas production. We forecast U.S. natural gas inventories will end March at 1% above the five-year average. In the forecast, the Henry Hub price reaches its winter peak in January at \$4.60/MMBtu."

Company Profile

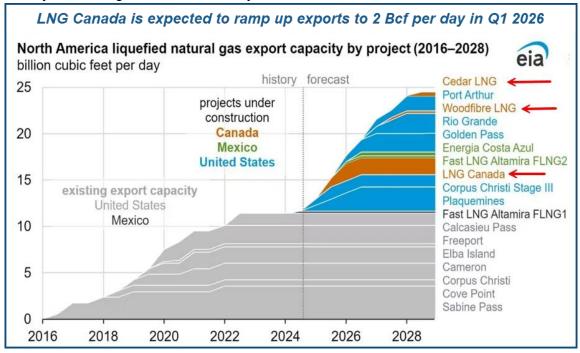

**September 22, 2025** 

#### EIA goes on to forecast >

"Historically, average annual prices for natural gas and oil change in tandem. We expect this year will be the first time they move in the opposite direction since 2014. By 2026, we forecast natural gas prices will be nearly double compared with 2024. < EIA's assumptions are based on normal winter space heating demand.

U.S. benchmark Henry Hub natural gas price averaged \$3.66/MMBtu in the first half of 2025 (1H25), 67% higher than the 2024 annual average of \$2.19/MMBtu. In contrast, the U.S. benchmark WTI crude oil price has averaged about \$12.00/MMBtu in 1H25, 11% lower than the 2024 annual average.

With these price movements, we expect decreases in natural gas produced as a byproduct of oil directed drilling will offset increases in that produced by natural gas-directed drilling. Overall, we expect U.S. marketed natural gas production will average 117.1 billion cubic feet per day (Bcf/d) in 2025 and 116.8 Bcf/d in 2026. We expect the Permian region, an oil-rich region that produces large amounts of associated natural gas, to slow production growth. Permian production in our forecast averages 27.6 Bcf/d in 2026, a 0.2 Bcf/d increase from 2025. We also expect natural gas production from the Bakken and Eagle Ford regions, as well as in the STEO region known as the rest of Lower 48 states, will decrease by 1.3 Bcf/d combined. However, we expect the natural gas-rich Appalachia and Haynesville regions will increase by a combined 0.8 Bcf/d in 2026."

### My Fair Value Estimate for PNE.TO is \$0.90Cdn/share (\$0.66US/share)

Compares to First Call's Price Target of \$0.86Cdn/share

**Disclosure:** I have a long position in PIFYF. I do not intend on buying or selling any shales in the next 72 hours. I wrote this profile myself, and it expresses my own opinions. I am not receiving compensation for it from the company. I have no business relationship with any company whose stock is mentioned in this article.

Company Profile

**September 22, 2025** 

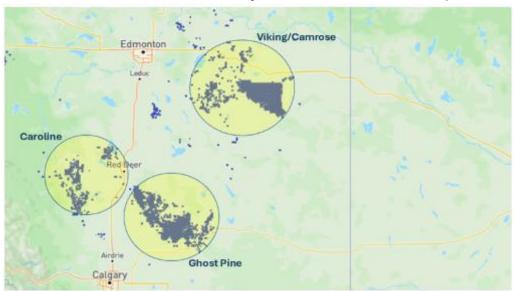

#### **Profile**

Pine Cliff Energy Ltd. is a public company actively engaged in the exploration, development and production of natural gas, crude oil and natural gas liquids. It trades on the TSX as PNE and PIFYF on the OTCQX.

Marketing and Trading Summary (as of Sep	otember 10, 2025)
Market Capitalization (1)	\$222.4 m
Average Daily Volume/Value	~0.19 MM/\$146k
52-Week Trading Range	C\$0.52 - C\$1.06 US\$0.38 - US\$0.78
Shares Issued <sup>(2)</sup>	358.8 MM

Pine Cliff prides itself on its employees, led by a management team with decades of experience in the exploration, development and production of oil and natural gas. Since 2012, the Company has grown from 100 barrels of oil equivalent per day (Boepd) to over 21,000 Boepd. Pine Cliff has grown by quickly executing counter-cyclical acquisitions, and has assembled a unique asset base with one of the lowest production decline rates in the public oil and gas sector.

#### Central Alberta Assets is today the Core Area of Development

**Company Profile** 

**September 22, 2025** 

The low decline rate affords Pine Cliff the ability to manage production with modest capital programs, drilling few of its low-risk drilling opportunities. Pine Cliff's asset structure gives investors the opportunity to participate in the Canadian natural gas market, with surplus cash flow being paid to shareholders in the form of monthly dividends.

With a high percentage of insider ownership, Pine Cliff's decisions have always been in-line with its shareholders, and it will continue to execute with one goal in mind - to maximize shareholder value.

#### **Business Strategy**

Pine Cliff's commitment to their investors and stakeholders is to always maximize their returns on their investment and to keep their trust. High integrity in all operations and full transparency throughout start to finish is paramount.

At Pine Cliff, we make sure to deliver high value with high quality assets, production, and shares.

#### Pine Cliff has:

- A <10% decline rate, keeps production flat
- Higher percentage of its cash flow can be returned to investors
- Ethical energy focus
- Well disciplined approach
- Consistent, long term, stable company that maximizes returns
- Deal opportunities that can be significantly leveraged
- Long Life Assets

<sup>(2)</sup> Estimated at Sep 10, 2025.

<sup>(3)</sup> Insiders include the Alberta Investment Management Corporation (AIMCO) and the officers and directors of Pine Cliff

Company Profile

**September 22, 2025** 

Our highly disciplined approach allows us to identify truly valuable long-life assets that have low decline rates and low operational risk, maximizing investors' risk-reward ratio.

**Share Value:** In this strong, competitive environment, we make sure to use prudent judgement and remain disciplined on every investment decision, whether that is an acquisition or project relating to our operations.

**Income Stream:** High quality assets lead to high quality income streams. Significant free cash flow (FCF) is generated from all of our low-operational cost projects that yield meaningful value.

#### 2024 Highlights

- Generated \$38.0 million (\$0.11 per basic and per fully diluted share) of adjusted funds flow for the year ended December 31, 2024 compared to \$58.7 million (\$0.17 per basic and \$0.16 per fully diluted share) for the year 2023:
- Production averaged 22,738 Boepd and 23,248 Boepd during the three months and year-ended December 31, 2024, representing a 6% increase and 13% increase from the comparable periods in 2023;
- Proceeds from dispositions totaled \$10.5 million in 2024, including the sale of a non-operated working interest in underutilized gas processing infrastructure in the fourth quarter;
- Capital expenditures totaled \$8.9 million in 2024, including abandonment and reclamation expenditures of \$6.4 million and maintenance capital of \$2.5 million; < No new wells were completed in 2024.
- Paid dividends of \$5.4 million (\$0.01 per basic and fully diluted share) and \$25.6 million (\$0.07 per basic and fully diluted share) during the three months and year ended December 31, 2024, compared to \$11.6 million (\$0.03 per basic and fully diluted share) and \$46.0 million (\$0.13 per basic and fully diluted share) for the same periods in 2023; < Monthly dividends were lowered to \$0.00125/share in 2025 as the Company is shoring up the balance sheet to fund their 2H 2025 drilling program.</p>
- Generated net loss of \$5.6 million (\$0.02 per basic and fully diluted share) and \$21.4 million (\$0.06 per basic and fully diluted share) for the three months and year ended December 31, 2024, compared to net income of \$0.8 million (\$0.00 per basic and fully diluted share) and \$9.1 million (\$0.03 per basic and \$0.03 per fully diluted share) for the comparable periods in 2023. < Pine Cliff was free cash flow positive from operations in 2023, 2024 and 1H 2025.</li>

#### Reserves as of December 31, 2024

Pine Cliff's independent reserve report (the "Report") was prepared by McDaniel & Associates Limited ("McDaniel") in accordance with National Instrument 51-101 Standards of Disclosure for Oil and Gas Activities ("NI 51-101").

Net present value for proved plus probable ("P+P") reserves of \$548.1 million, discounted at 10%, an increase of \$71.3 million, or 15%, from December 31, 2023, primarily as a result of the extensions, improved recoveries and lower lease operating expenses, all offsetting the impact of lower natural gas benchmark pricing;

**Company Profile** 

**September 22, 2025** 

- Pine Cliff increased its 2024 P+P reserves by 13.5 MMBoe4 prior to adjusting for 2024 production, representing a reserve replacement ratio of 158%. 15.1 MMBoe was added by extensions, improved recoveries and lower operating expenses;
- Remaining P+P reserves of 94.1 MMBoe5 (70% conventional natural gas and coal bed methane) at December 31, 2024 increased 5.5% from 89.2 MMBoe at December 31, 2023 a result of the extensions, improved recoveries and lower lease operating expenses; and

#### First Quarter 2025 Results

#### First Quarter 2025 Summary Highlights:

- Production averaged 21,283 Boepd for the three months ended March 31, 2025, down 11% from the 23,865 Boe/d for the comparable period in 2024 due to natural declines and cold-weather related outages that have since been restored.
- Generated \$11.5 million of adjusted funds flow (\$0.03 per basic and fully diluted share) for the three months ended March 31, 2025, an increase from \$10.5 million (\$0.03 per basic and fully diluted share) for the same period last year.
- Reduced net debt by \$3.5 million or 6% to \$58.8 million as at March 31, 2025 down from \$62.3 million as at December 31, 2024.
- Paid dividends of \$5.4 million (\$0.02 per basic and fully diluted share) during the three months ended March 31, 2025.

#### Operational update:

Capital expenditures of \$1.2 million in the first quarter were limited to facilities and maintenance capital. The 2025 capital budget announced on April 2 of \$23.5 million, including \$12.5 million of development spending planned in the second half of the year, is unchanged. < Fully funded by operating cash flow.

**Second Quarter 2025 Results** < Note that production was only down slightly despite no new wells being completed during 1H 2025. Weather related issues in Q1were all resolved by mid-Q2.

- Production averaged 21,236 Boepd and 21,259 Boepd for the three and six months ended June 30, 2025, compared to 23,688 Boepd and 23,776 Boepd for the same periods in 2024.
- Generated a net loss of \$7.1 million (\$0.02 per share basic and fully diluted) and \$9.9 million (\$0.03 per share basic and fully diluted) for the three and six months ended June 30, 2025, compared to net loss of \$4.1 and \$9.0 million for the same periods in 2024.
- Generated \$4.9 million (\$0.01 per basic and fully diluted share) and \$16.4 million (\$0.05 per basic and fully diluted share) of adjusted funds flow for the three and six months ended June 30, 2025, compared to \$10.8 million (\$0.03 per basic and fully diluted share) and \$21.3 million (\$0.06 per basic and fully diluted share) for the same periods in 2024;
- Reduced net debt by \$3.4 million or 5% to \$58.9 million on June 30, 2025 down from \$62.3 million on December 31, 2024.
- Paid dividends of \$1.3 million (\$0.004 per basic and fully diluted share) and \$6.7 million (\$0.02 per basic and fully diluted share) during the three and six months ended June 30, 2025, compared to \$5.4 million (\$0.02 per basic and fully diluted share) and \$14.9 million (\$0.04 per basic and fully diluted share) during the same periods in 2024.

**Company Profile** 

**September 22, 2025** 

#### Capex and Hedge Update:

- Production in the second quarter was consistent with the first quarter and down from the same quarter last year primarily due to natural production declines and temporary shut-ins due to weak AECO gas prices in June 2025.
- Capital expenditures of \$2.3 million in the second quarter were limited to facilities and maintenance spendings, bringing total capital expenditures to \$3.6 million in the first half of 2025. The 2025 capital budget of \$23.5 million is unchanged, which includes \$12.5 million of development spending.
- Pine Cliff continues to use physical hedging as part of its ongoing marketing strategy to help protect cash flow, resulting in an average realized natural gas price of C\$2.48/Mcf in the second quarter, representing a 48% premium to the AECO Daily 5A average price of C\$1.68/Mcf.
- In recent months, Pine Cliff has increased its hedge position to approximately 54% of gross natural gas production at an average price of \$2.82/Mcf through the second half of 2025.
- Approximately 43% of gross crude oil production has been hedged at US\$64.15/Bbl for the same period.

**Company Profile** 

**September 22, 2025** 

#### 2025 Capital Program announced April 2, 2025 < Confirmed at September 15 EPG Luncheon

Pine Cliff announced a 2025 capital spending program of approximately \$23.5Cdn million. This includes \$12.5 million dedicated to strategic drilling in its core Central Alberta area, with the balance allocated for facilities maintenance and asset retirement obligations.

#### Reallocating Capital to Support Drilling Program

In 2024, Pine Cliff halted its development drilling program while Canadian gas prices were low and instead allocated capital to shareholders through dividend payments. Pine Cliff continuously reviews its capital allocation options, and with a highly economic inventory on its land base, the Company has decided to direct a portion of its adjusted funds flow in 2025 into asset development. Drilling is planned for the fourth quarter of 2025, and Pine Cliff expects to provide production guidance for 2025 later this year once the optimal use and timing of the development capital across its land base is determined.

As a result of Pine Cliff's shifting capital allocation, the dividend was reduced from \$0.06 per share annually to \$0.015 per share per year. On September 2, 2025 Pine Cliff declared a monthly dividend of \$0.00125 per common share to be paid on September 29, 2025, to shareholders of record on September 15, 2025. This dividend and future dividends are expected to be designated as non-eligible dividends for Canadian income tax purposes. Since introducing the dividend in June 2022, Pine Cliff has allocated over \$100 million in dividend distributions and will continue to balance near-term shareholder distributions with long-term shareholder returns. < Monthly dividends are expected to remain at \$0.00125 per share through 2025 and until AECO natural gas prices rebound to over \$3.50Cdn/MMBtu. AECO Strip prices for DEC25 and Q1 2026 are back over \$3.00Cdn/MMBtu as of the date of this report.

#### Renewal and Extension of Debt Facilities announced June 2, 2025

Pine Cliff is pleased to announce it has finalized the renewal of its demand loan with a Canadian chartered bank at \$15 million. The reduction to \$12 million that was previously scheduled for May 31 has been eliminated.

The Company has also amended the agreement with its term debt holder to reduce its annual scheduled amortization payments to 7.5% of the initial principal balance from 15.0% previously, while also extending the maturity date on the facility to January 3, 2028. The dividend-linked amortization payments introduced in late 2024 have been eliminated.

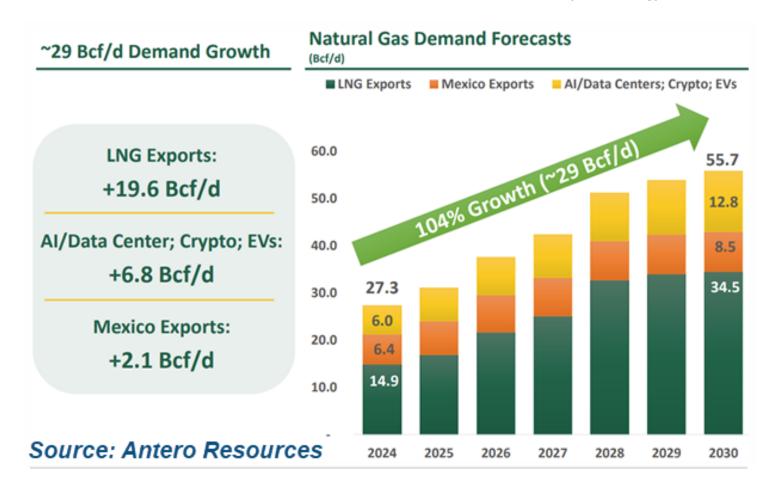

**Company Profile** 

**September 22, 2025** 

#### Reasons to invest in Pine Cliff Energy Ltd.

#### **Strong Demand for North American Natural Gas:**

"In addition to rapidly increasing global demand for North America's LNG, rising demand for electricity from the expansion of artificial intelligence-focused data centers, crypto and electric hybrid vehicles are increasingly seen as supporting an extended period of power-gen development from all sources, including natural gas. Al and cloud computing are accelerating U.S. electricity demand, with data center needs expected to increase from 10 GW in 2024 to over 60 GW by 2035. Natural gas will be essential for power generation." – Rystad Energy

**Disciplined Capital Allocation:** Given strength of development inventory, Pine Cliff recently allocated cash flow to fund a \$23.5 million capital program in 2025, while maintaining monthly dividend payments to shareholders. Pine Cliff has returned \$100 million in the form of dividends to shareholders since June 2022.

**Managed Balance Sheet:** Continues to pay down term debt to manage the balance sheet. Term debt was \$44.3 million outstanding as of March 31, 2025, down from \$49.2 million on December 31, 2024.

**Company Profile** 

**September 22, 2025** 

**Leverage to Canadian Natural Gas Prices:** Significant leverage to Western Canadian AECO gas prices provides exposure to improving energy and natural gas fundamentals in Western Canada with the first of LNG Canada shipments started in July 2025 and growing energy demand globally. *Global LNG demand is forecast to exceed available supply by 2027, creating opportunities for new projects. While current LNG developments will contribute to supply growth, Shell expects that additional capacity will be needed post-2030. Canada and the U.S. are well-positioned to capitalize on this emerging supply gap, as Asian and European demand remains strong.* 

**Higher Inside Ownership:** AIMCo, one of the largest institutional investors in Canada, is Pine Cliff's largest shareholder and owns over 10% of the company's equity; senior management and directors own 4% of the company.

**Low Production Decline Rate:** Production decline rate of < 10% is one of the lowest among all Canadian public producers (32% natural gas-weighted industry average). Reduces capital requirements, provides significant flexibility around reinvestment into the business and increases free cash flow compared to peers.

**High-Quality Running Room in Central Alberta**; Pine Cliff has an attractive inventory of development drilling locations that have short payouts and strong rates of return on investment. < 2H 2025 and 2026 drilling programs will focus on Glauconite and Ellerslie, because of the higher IRRs.

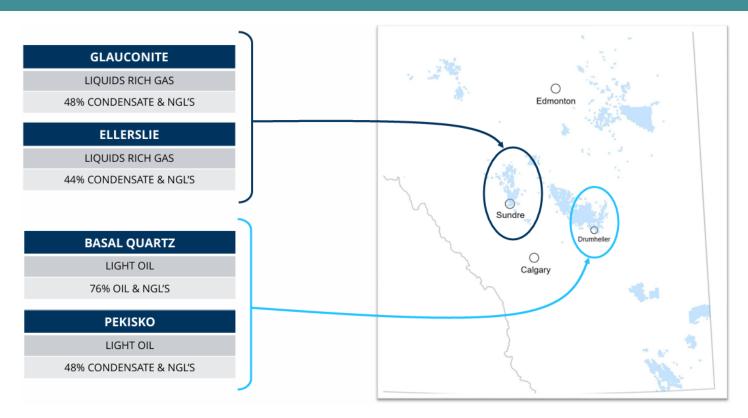

Pine Cliff Core Areas have a significant amount of Running Room
